DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

X, Y, R2, R4, R5 and R6.

Applicant is required, in reply to this action, to elect a single species to which the preliminary search for the claims will be directed and to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Art Unit: 1618

Claims 1 – 8, 11, 12, 14, 17 – 23, 25, 26, and 36 – 40 correspond to a structure wherein X is N.

Claims 1 – 6, 9, 10, 13, 15, 16, 18 – 24, 26 – 38 and 40 correspond to a structure wherein X is S.

Claims 1 – 7, 12, 15, 18 – 23, 25, 26, 36 and 38 – 40 correspond to a structure wherein Y is N.

Claims 1 – 6, 9, 11, 13, 18 – 24, 36 and 38 – 40 correspond to a structure wherein Y is S.

Claims 1 – 6, 8, 10, 16 – 23 and 36 – 40 correspond to a structure wherein Y is P.

The following claim(s) are generic: 1 and 36 – 40.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the structures disclosed in claims 1 and 36 – 40 are generic to the following species: X, Y, R2, R4, R5 and R6 having differing substituents (i.e. N or S for X; S, N, or P for Y; carboxylate, amine, etc. for R2, H, alkyl, carboxylate for R4 and 5, and H, alkyl, aryl, or biomolecule for R6) which render the compounds structurally different while altering the ultimate donor properties and would require an undue search burden by the office.

A telephone call was not made to request an oral election to the above restriction requirement because of the complexity of the election requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention. **NOTE:** A single specific compound should be elected having defined variables X, Y, R2, R4, R5 and R6 to which the preliminary search for the invention will be directed.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leah Schlientz whose telephone number is 571-272-9928. The examiner can normally be reached on Monday - Friday 8 AM - 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hartley can be reached on 571-272-0616. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
